

**Doctoral Consortium Call for Nominations**  
***ICIS invites nominations for its 2011 Doctoral Consortium at Fudan University in Shanghai.***

Since the 1980s, the Consortium has provided students who are doing their doctoral dissertations with the chance to present and obtain comments on their research, to hear about the work of their peers, and to gain an understanding of what academic and research careers are all about. It also offers students a chance to make new friendships with other students and leading faculty around the globe. We invite you to participate!

**Planning Dates**

Proposal submission deadline: No later than midnight, U.S. Pacific Daylight Time on Tuesday, May 31, 2011  
Consortium days: From Wednesday late afternoon, November 30 to Saturday morning, December 3, 2011

**Consortium Co-Chairs**

**Rob Kauffman**  
Dartmouth College and  
Singapore Management University  
[rob7585@gmail.com](mailto:rob7585@gmail.com)

**Jae Kyu Lee**  
Korea Advanced Institute of Technology  
[jlee@business.kaist.ac.kr](mailto:jlee@business.kaist.ac.kr)

**Consortium Venue**

**Fudan University, Shanghai**

**Consortium Eligibility**

Participation in the Consortium is by invitation only based on competitive selection at the student's university. If different units of a university hold separate AIS memberships, then each unit is permitted to submit a nominee. Each student selected for the Consortium is expected to attend all Consortium meetings and activities, from the opening on Wednesday to the closing on Saturday. Candidates who are not able to make this commitment should not apply.

Ph.D. students currently working on IS dissertations are eligible for nomination. Candidates should intend to pursue an academic career in IS following the completion of their Ph.D. studies. Selected candidates must successfully defend their dissertation proposals before the end of 2011, although they need not have done so prior to the submission deadline. Students who plan to defend their dissertations prior to mid-December 2011 should not apply, and those who end up completing their dissertations before the Consortium will not be permitted to attend.

The Consortium is designed as an intensive multi-day "in-residence" personal development experience. Participants must not bring guests or family members to the event. Students who are selected to participate in the Consortium will receive instructions on how to prepare their research papers for presentation. Please visit the decided space for the Doctoral Consortium at the ICIS 2011 website at [icis2011.aisnet.org](http://icis2011.aisnet.org) for more details and information on the nomination submission requirements.
